## **THE PURPOSE OF THE 9. INTERNATIONAL SCIENTIFICALLY AND PROFESSIONAL CONFERENCES**

After a short break the Science and research centre Koper Institute for kinesiology research is organizing the 9th International scientific and professional conference **"A child in motion"** which will take place in the Slovenian coast. The physical activity is the integral part of children's behaviour and constant communication with the environment that is why it is essential for a harmonious development of children. Today's lifestyle, that the society designs and offers to young people certainly does not encourage daily exercise/sports, furthermore, the need to move which accompanies the human throughout the evolution is unfortunately fading.

The novelty of the conference is the technical workshops **"Active in kindergarten and school"**, which aim to demonstrate the newer approaches that are used in practice.

## **CONTENT SETS**

The key thematic areas of scientific and professional work of the conference will be presented in six sections:

- **THE MOTOR COMPETENCES IN THE INTEGRATED DEVELOPMENT OF CHILDREN**
- **BIOMECHANICAL, PHYSIOLOGICAL, AND HEALTH ASPECTS OF MOTOR DEVELOPMENT OF CHILDREN**
- **PSYCHOLOGICAL, SOCIAL, AND EDUCATIONAL ASPECTS OF MOTOR DEVELOPMENT OF CHILDREN**
- **BALANCED DIET AND INTEGRATED DEVELOPMENT OF CHILDREN**
- **PHYSICAL ENVIRONMENT AS AN INCENTIVE FOR MOTOR DEVELOPMENT OF CHILDREN**
- **PHYSICAL ACTIVITY FOR CHILDREN – OPEN TOPICS**

Their research findings will be presented by renowned domestic and foreign experts in the framework of plenary lectures and active participants within individual sections. Lectures will be followed by a technical workshop, "Active in kindergarten and school" through which the experts will present examples of good practice of knowledge transfer in this area. Conferences and workshops are intended for all who work in the field of education, physicians, researchers, university teachers, and students as well as professionals engaged in the creation of stimulating physical environment for children and others who are interested in selected themes of the conference. We invite you to enrich the conference with your presence and your latest discoveries.

With best regards!

Assist. Prof. Tadeja Volmut  
President of the Organising Committee

Prof. Dr. Rado Pišot  
President of the Scientific Committee
