

PSE Summer School: applications are open!

The [2016 PSE Summer School](#) offers research-oriented teaching, in **four intensive one-week programmes**. Each programme is a full-time mix of coherent courses on topical issues, taught by PSE professors

All information about curriculum, tuition fees, requirements... is available - for each programme - below or directly in the [PSE Summer School brochure](#).

The application deadline is **Tuesday March 15, 2016** - see "[How to apply?](#)"

.....

DEVELOPMENT “Inequality, social interactions and institutional dynamics in development” 27th of June to 1st of July 2016

Institutions and social frictions - associated with inequalities, political conflicts, cultural polarization, and migration - have emerged as central themes in development economics. Based on both formal theory and rigorous empirical research, this programme draws the outlines of the current research frontier. [More...](#)

> *Professors:* François Bourguignon, Thierry Verdier, Hillel Rapoport, Denis Cogneau and Oliver Vanden Eynde

> *Programme supervisor:* Oliver Vanden Eynde

.....

MICROECONOMETRICS “Policy Evaluation”

27th of June to 1st of July 2016

This programme presents recent developments in the microeconomic analysis of impact evaluation.

Providing a credible estimation of a causal effect has become a standard in economic analysis, both in research papers and policy reports. But it is also equally important to integrate the estimated effects into economic models, in order to improve the design of policies. Professors will propose a comprehensive approach of policy analysis. [More...](#)

> *Professors:* Luc Behaghel, Margherita Comola and David Margolis

> *Programme supervisor:* Gabrielle Fack

.....

INDUSTRIAL ORGANIZATION “Market Strategy”

4th of July to 8th of July 2016

Three main topics are addressed in this programme: competition policy (exchange of information between competitors, empirical techniques), the economics of platforms, and consumers search. These subjects are currently at the core of the liveliest debates among academics and practitioners in Industrial Organization. Professors will present the most recent developments of the empirical and theoretical academic literature. [More...](#)

> *Professors:* Bernard Caillaud, Philippe Gagnepain, Régis Renault and David Spector

> *Programme supervisors:* Philippe Gagnepain and Jean-Philippe Tropicano

.....

MACROECONOMICS “Macroeconomics useful for Policy”

4th of July to 8th of July 2016

This program tackles topics at the frontier of policy-relevant research: recessions and liquidity traps; crises and bubbles; heterogeneity, financial frictions and unemployment; and international linkages. It includes a quantitative module, consisting of hands-on applications of state-of-the-art techniques relevant for solving the models discussed in class. [More...](#)

> *Professors:* Florin Bilbiie, Jean Imbs, Xavier Ragot, Romain Rancière and Gilles Saint-Paul

> *Programme supervisor:* Florin Bilbiie
