
Study literature

Being a university student requires a lot of reading for your classes, exams and tests. There are books you can borrow in our library, or you will be given study literature by your teachers. However, if you are serious with the profession you have chosen, you are recommended to buy some selected volumes that are crucial for your degree, and will be your guide at any point of your future career.

Anatomy and Physiology will be the base of your knowledge, one of the below-written books is recommended:

- Moore, K. L., Dalley A.F., Moore, P.: Clinically Oriented Anatomy. Lippincott Williams & Wilkins; Paperback Older Edition. ISBN: 0683061410

or any book of anatomy written by HENRY GRAY, e.g. Gray's Anatomy of Human Body.

If you are an applicant for Physiotherapy or our current Physiotherapy student, please click [HERE](#) to see the list of physiotherapy-related literature.

See the list of literature written below. The list shows the books all physiotherapy students are recommended to buy, as they represent the prerequisite base of the program. If you are very serious about the profession you have chosen, then these are the volumes every physiotherapist should have.

1st Year:

- Kendall, F.P., Mc Creary, E, K.: Muscles: Testing and Function.
- Lippincott Williams & Wilkins; 4th edition. ISBN: 0-683-04576-8
