
Information for Applicants

Come and study Physiotherapy at UK FTVS!

WE WILL TEACH YOU TO EXPERIENCE MOVEMENT AND LIVE THROUGH PHYSIOTHERAPY!

A stable team of teachers ensures a close connection of individual specialist subjects. Many clinical practices during your studies in top healthcare facilities will prepare you professionally for the performance of a healthcare profession. A variety of practical teaching of physical activities and sports will give you the advantage of personal experience that you will use for yourself and for your patients or clients.

STUDY PROGRAMS:

PHYSIOTHERAPY

full-time, bachelor's, 3 years

A graduate of the field of Physiotherapy will acquire the professional qualification to perform a highly sought after job and prospective non-medical health profession.

Physiotherapist provides prevention, diagnosis and therapy of functional disorders, especially of the musculoskeletal system, in all types of health and social facilities (e.g. for children or the elderly) and sports clubs.

APPLIED PHYSIOTHERAPY

full-time, follow-up master's, 2 years

The study expands the knowledge and skills acquired by completing a bachelor's degree in Physiotherapy and focuses on the independence of a physiotherapist at work, the ability to perform differential diagnosis and the provision of specialized physiotherapy care.
